This addendum is being issued to revise the Notice to Contractors and Special Provisions.

In the Special Provisions, Section 10-1.17, "EXISTING HIGHWAY FACILITIES," subsection "ADJUST METAL BEAM GUARD RAILING," is revised as follows:

"ADJUST METAL BEAM GUARD RAILING

Existing metal beam guard railing, at the locations shown on the plans, shall be adjusted to grade to conform to the height requirements for new railing in conformance with the details shown on the plans and these special provisions.

Where the change in rail element height is 2 inches or less, the element and block may be raised by drilling a new bolt hole in the post. The new hole shall be treated in conformance with the provisions for treating field bored holes in Section 83-1.02B, "Metal Beam Guard Railing," of the Standard Specifications. The new hole shall be offset approximately one inch towards the leading edge of the post (towards approaching traffic) from the vertical plane of the original hole.

Adjust metal beam guard railing will be measured by the linear foot from end to end along the face of the adjusted railing, including along and around the face of return, end, and terminal sections."

In the Special Provisions, Section 10-1.21, "RUBBERIZED HOT MIX ASPHALT – OPEN GRADED HIGH BINDER," subsection "MATERIALS," the first paragraph is revised as follows:
